

SAFETY-COMPLIANCE APPAREL FOR THE ELECTRICAL INDUSTRY

QUALITY 100% PURE MERINO WEAR

At Kiwi Sock Company we understand the demands of ever-increasing safety compliance requirements within the electrical industry. Protecting your employees when working in hazardous conditions is your top priority. Kiwi Sock Company brings you this great range of comfortable and warm 'next to the skin' safety garments to ensure your employees are always protected.

We believe we have a range of products that employees will **want** to wear, not feel they **have** to wear – and this goes a long way to ensuring compliance.

Benefits of 100% Pure Merino Wool

- Unique natural fire resistance properties
- No static build up
- Ability to keep body warm in winter and cool in summer
- Damage from arc flash is significantly reduced when wearing wool next to the skin

LONG JOHNS

LONG SLEEVE TOPS

SHORT SLEEVE TOPS

- Made from super fine 19.5 Micron merino wool (fabric weight of 200gsm), selected to minimise skin irritations usually associated with wool
- Available in both short and long sleeve
- Shrink treated and machine washable
- Form fitting design creates a comfortable fit under clothes
- Arc rated sewing threads

GLOVES

- Fine enough to fit inside heavy duty work gloves
- Firm but comfortable elasticised cuff

BEANIES

BALACLAVAS

- Designed to fit under safety helmets comfortably whilst providing warmth in cold conditions
- Single layer fabric to reduce bulk
- Arc rated sewing threads

SOCKS

- Heavy weight with reinforced sole
- Elastic leg and arch support
- Hard wearing and durable
- 80% Merino wool / 20% nylon blend
- Added APEX flame proof treatment to further enhance safety

Please contact us and we can provide you with a competitive quote based on your requirements and volumes.
